DETAILED ACTION

1. This office action is in response to the RCE, Paper No. 13, filed March 03, 2003.

Accordingly, claims 1, 10, 12, 18 and 20 were amended, and new claim 22 was added. Currently, claims 1-10, 12-18 and 20-22 are pending in this application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-10, 12-18 and 20-22 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not disclose the composition of the ferroelectric liquid crystal (FLC) material which still maintains the smectic phase when the liquid crystal panel is cooled to -20 degrees so as to produce monostable alignment of ferroelectric liquid crystal, then substantially heated to room temperature. This composition of the FLC material is essential to support the claimed invention. As in "Novel Ferroelectric Liquid Crystal Mode for Active Matrix Liquid Crystal Display using Cholesteric-Chiral Smectic C phase Transition Material" (Applicant's IDS), Asao et al. discloses that the FLC composition used in the experiment was FLC-A, which consisted of hydrocarbon compounds having the phenyl-pyrimidine core. According to the phase sequences, the FLC-A became crystallized at -7.2 degrees C

(see Experiments). Therefore, it is necessary to know what kind of FLC which still maintains the smectic phase when cooled to -20 degrees C.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thoi V. Duong whose telephone number is (703) 308-3171. The examiner can normally be reached on Monday-Friday from 8:00 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim, can be reached at (703) 305-3492.
